EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Keith Townsend on May 20, 2008. Mr. Townsend authorized the following amendments in order to place the claims in condition for allowance. The application has been amended as follows:

54. (Currently amended) An exercise apparatus for muscular stimulation of a user, which apparatus comprises;
a pressure sensor,
a control unit to which pressure values sensed by the pressure sensor are fed, and
a vibrational stimulator for applying vibrational stimulation to a user,
wherein the vibrational stimulator is adapted to be activated by the control unit in response to the pressure sensor sensing an applied pressure which exceeds a threshold pressure value, and

the vibrational stimulator includes a unit having an exercise portion which is adapted to both

(i) apply vibrational stimulation to the user when the vibrational stimulator is activated by the control unit, and

(ii) in addition to said vibrational stimulation, cause reciprocal movement of the exercise portion ~~reciprocally move~~, in a predetermined manner[,] relative to the user in response to the pressure sensor sensing an applied pressure exceeding the threshold pressure to induce physical exertion in the user.

80. (Currently amended) A method for operating the apparatus as defined in claim 54, which method comprises providing the apparatus of claim 54, the user applying an initial pressure which is sensed by [a] said pressure sensor, recording the said initial pressure value sensed by the said pressure sensor, and applying vibrational stimulation to the user by [a] said vibrational stimulator in response to the user applying pressure to the said pressure sensor which exceeds a threshold pressure value determined by the said initial pressure value.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art fails to disclose or make obvious an exercise apparatus as recited in claim 54. The prior art fails to show or teach an apparatus comprising the recited elements in combination with the capability of the vibrational stimulator to apply vibrational stimulation to the user when activated by the control unit. and also cause reciprocal movement of the exercise portion as claimed, with the reciprocal movement inducing physical exertion in the user and being enabled when the threshold pressure is exceeded and sensed by the pressure sensor. Therefore, once an applied pressure is sensed and exceeds the threshold pressure, the vibrational stimulator not only vibrates, but also moves in such a way that causes the user to exert themselves, thereby enabling the user to exercise.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALLANA LEWIN whose telephone number is (571)272-5560. The examiner can normally be reached on Monday-Friday, 9AM-5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, LoAn Thanh can be reached on 571-272-4966. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
